

Bucket Truck OSHA & ANSI Dielectric Testing

INSPECTION CONSISTS OF:

- Highly trained personnel perform all dielectric testing
- Dielectric Tests up to **100 KV AC**
- All equipment is carefully inspected for any damage or wear prior to testing.
- All test are performed in accordance with ASHA rulings and ANSI standards
- Customers are provided detailed test sheets (Pass or Fail)
- All passing items are certified and promptly returned to customer
- *In the event additional work is needed to your unit. Telford Fifty-Five Enterprises will notify you immediately of the repairs needed and give you an estimate on a time and material basis. No repairs will be made until we have received a signed repair estimate from you the customer.*
- **Bring your equipment to our testing area and let us do the rest.**

We Also Offer:

- Preventative Maintenance Programs
