

The Leader in Rooftop Delivery

SAVES TIME!

The Power Bed reduces the walking, lifting and carrying distance on the truck bed when loading roofing material onto the conveyor. This saves valuable time that can be used to make more deliveries.

SAVES MONEY!

The Power Bed will help reduce the workman's compensation claims and injuries filed each year with your company as they relate to moving and lifting of roofing material. This will save you money.

REDUCES EMPLOYEE TURNOVER!

The Power Bed reduces the very exhaustive and demanding physical requirements needed by each employee loading roofing material. This helps the employee enjoy his work more.

Easy Installation

The Power Bed can be easily installed on to any existing or new truck bed. There are very few moving parts to the Power Bed system, which makes installation and service require very little time.

Hydraulic Pallet Mover

The Leader in Rooftop Delivery

SPECIFICATIONS

Weight: Approximately 1,500 lbs.
Truckbed Length: 24', 26', 28'
Hydraulic: PTO powered
Load Capacity: 40,000 lbs.

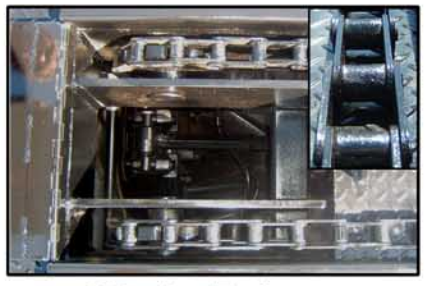

Hydraulic Power

The Power Bed is powered from the existing hydraulic system installed on the truck to run the conveyor. A simple forward and reverse hydraulic valve is all that is needed to operate the Power Bed.

Heavy Duty Gear Box Drive

The drive system for the Power Bed consists of a heavy duty gear box driven by a hydraulic motor. The gear box is easily accessible for service and maintenance.

Chain Driven

The Power Bed uses a very heavy duty logging chain to move the roofing material across the bed of the truck. This chain has been tested to move 40,000 lbs. of roofing material and proven to be very reliable.

The Power Bar

The power bar is a 6" x 6" heavy duty square steel tube designed to move 40,000 lbs. of roofing material across the truck bed to the conveyor and turntable.
